

MELODIC DIATONIC TRIADS!

FROM DIGGING DEEPER JAZZ - VIDEO #160

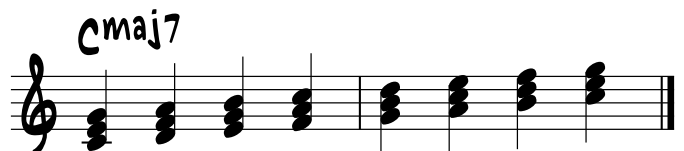

For the novice and intermediate level jazz player, there is no better item to practice than Melodic Diatonic Triads. Melodic just means "one note at a time." This device offers us nicely organized melodies that aren't just great for technique practice, they are great ideas to use in our improvised solos.

We get a lot of bang for our buck too. A pattern in C major is the same pattern for D minor dorian, or F lydian, or G mixolydian and so on. Time to fit this into your practice routine!

#1 - C major scale

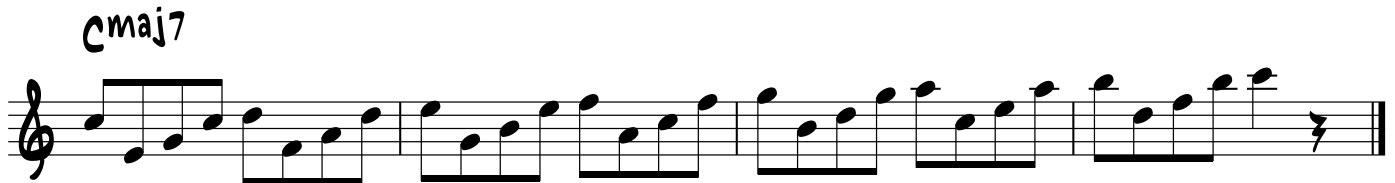

#2 - Diatonic Triads of C major scale

#3 - Simple melodic pattern, based on #2

#4 - Pattern using an inversion of the triads

#5 - Melody using different inversions of the triads
