

MINOR ii-V HAPPINESS

FROM DIGGING DEEPER VIDEO #167

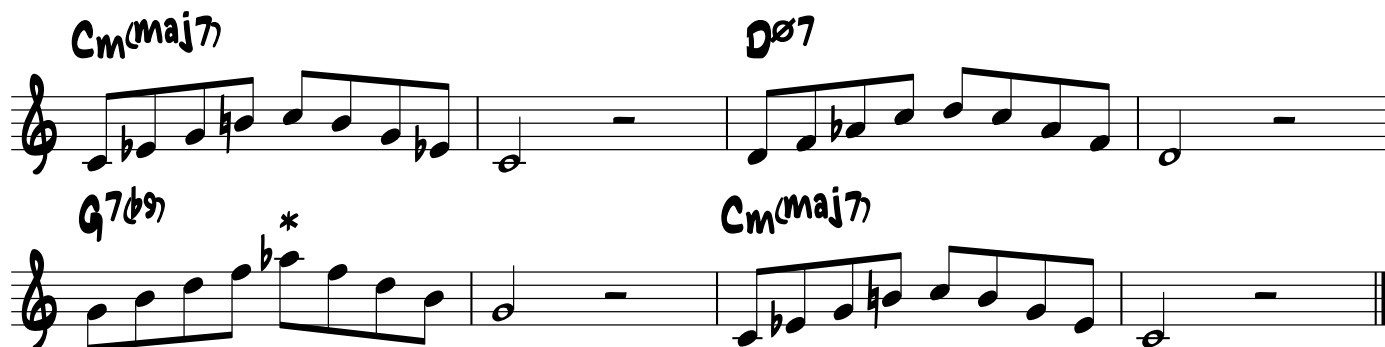

We see minor ii-V's in a majority of the songs that we play, even tunes that are in a major key. And alas, most of us don't have a good way to EASILY understand and practice this important progression. Too many teachers make minor ii-V's much more difficult than they need to be. The long and the short of it is this - use Harmonic Minor, and two of it's modes.

#1 - C Harmonic Minor, 2nd mode Harmonic Minor, 5th Mode Harmonic Minor

Every note in item #1 (above) is from the C Harmonic Minor scale. Here we see 60 different pitches, EVERY one of which is from the parent key of C Harmonic Minor. No alterations, no special cases, no exceptions. One scale covers it all. Learn these three modes of HM.

#2 - Arpeggios (1-3-5-7-8), all based on C Harmonic Minor

Again, 36 more pitches here in item #2, EVERY one of which is from the C Harmonic Minor scale. Learn these three scales (modes of HM) and these three arpeggios, and you are SET!

** notice, on the G7(b9) arpeggio, we go up to the b9. It's a hip note!*
