

PENTATONICS & SIDE SLIPPING

FROM DIGGING DEEPER VIDEO #190

The pentatonic scale is one of the most inside, most melodic sounding scales known to man. Indeed, it is found in the music of most cultures around the world, cultures that historically had never met. Spooky! Most likely aliens involved.

The melodic nature of the pentatonic sound make it an ideal tool to use when we begin playing more advanced sounds as well. One approach to "playing out" involves being *very* inside, and then moving, extremely clearly, to being *very* outside. Two pentatonic scales, a half step apart, are a great way to help us get this classic sound.

#1 - Bb Major Pentatonic

#2 - B Major Pentatonic

#3 - "Turnaround Progression" (I - VI - ii - V)

#4 - Melodic material, ONLY using Bb pentatonic and B pentatonic
