

BEING MELODIC (WITH PENTATONICS)

The trick? Use a pentatonic pattern, and simply vary the rhythm. It can be a rhythmic **pattern** as we see in #1b below, or it can be an **improvised rhythm**, as we see in #2b below.

The power here is that we are using predetermined notes (the melodic pentatonic pattern we've chosen), and varying (or improvising with) only the rhythms. We are getting a lot of melodic bang for the buck, but making few (or NO) decisions.

#1A - C PENTATONIC, "4 NOTE GROUPING" ASCENDING

#1B - ADDING ONE BEAT (AUGMENTING THE TIME/RHYTHM)

#2A - C PENTATONIC, "SKIP UP, STEP DOWN" ASCENDING & DESCENDING

#2B - FREE RHYTHMS, CHANGING DIRECTION "WHENEVER"
