

GROUPINGS OF "3" IN 4/4 TIME

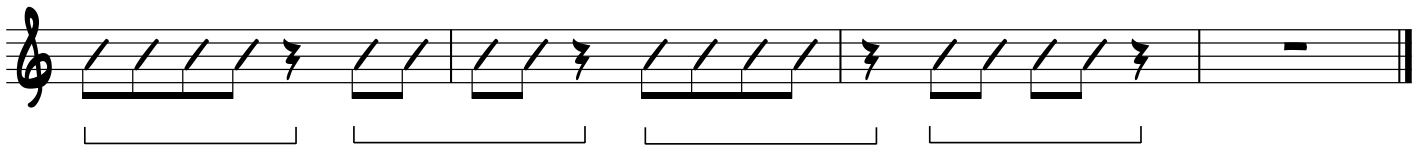

Here, we are talking about grouping a number of beats in our minds, specifically rhythmic groupings of three quarter notes (or six 8th notes). In short, 3/4 rhythms (although we are playing in 4/4). Note, this is different than playing "three over four," in the sense of a triplet . . . three notes in the time of four quarter notes. These are simply "groupings."

Below, the square bracket under each example shows the grouping of three quarter notes (8th notes and rests), as it plays out over 4/4 time.
