

MINOR PENTATONICS (ON MAJOR)

FROM DIGGING DEEPER VIDEO #149

The Minor Pentatonic Scale is one of the hippest and most used sounds, in ALL musical styles, in the last hundred years. Blues, jazz, rock, funk, country and classical music all use this sound like crazy. If you are in C minor, the C Minor Pentatonic scale is where you'll find many/most of the classic melodies you know. Bluesy, memorable, and classic.

But we are hipper than that. The sound of Minor Pentatonic, that collection of five notes that is very related to the Blues Scale, can be used in other harmonic settings, over other chords. Let's look at how we can play Minor Pentatonic in a Major 7 (#11) setting.

#1 - The B Minor Pentatonic Scale

#2 - The B Blues Scale

#3 - Using B Minor Pentatonic over C major

The formula is "use the Minor Pentatonic Scale built on the 7th of the major chord that you want to improvise over."

#4 - Green Dolphin Street
