

GET GOOD W. GHOSTING!

FROM DIGGING DEEPER JAZZ VIDEO #152

That's right, "to ghost" is a verb! Ghosting is when we play a note softer than the notes around it, much like we do in language, where adjacent syllables are often not spoken at the same volume as each other. That "computer voice" from old movies sounded unhuman for just this reason. All the syllables of every word were enunciated at the same volume. Let's not have you play jazz as if you were a computer from a 1963 sci fi film!

Ghosted notes are almost never notated in the music. We have to be experienced enough to find them on our own. They are generally the lowest note in a line, surrounded by higher notes on each side.

In the line above, the ghosted notes are marked as being inside parenthesis (). They are two of the three "lowest notes in the line." The only other "low note" is the last note of the first measure, the G. Although it's a "lowest note," it is marked as accented, and it's a longer note, so we would not ghost that one.

Bb Instruments

2 C Instruments

Chords: F7, Bb7, F7, F7, Bb7, Bb7, F7, D7(b9), Gm7, C7, F7, D7, Gm7, C7.

Eb Instruments

Chords: D7, G7, D7, D7, G7, G7, D7, B7(b9), Em7, A7, D7, B7, Em7, A7.

Bass Clef Instruments

Chords: F7, Bb7, F7, F7, Bb7, Bb7, F7, D7(b9), Gm7, C7, F7, D7, Gm7, C7.
