

HALF DIMINISHED HELP!

FROM DIGGING DEEPER VIDEO #103

The Half Diminished chord, also known as Minor Seven Flat Five, is pretty scary looking compared to other chords. It uses arcane symbols ($D\emptyset 7$), or uses a lot of ink [$Cm7(b5)$]. Look it up in the back of a theory book or on Wikipedia, and you'll wish you hadn't. Go back to Digging Deeper Jazz video #49 to get a full sense of what's what with Half Diminished.

Today, a cool little trick. The Half Diminished chord functions a lot like a minor chord, looks a lot like a minor chord, and even has a minor chord living inside it. As an improviser, we can actually just use our "minor vocabulary," our minor licks, over the Half Diminished sound. We just need to do a little conversion from one to the other. It's not that hard, and you'll essentially be doubling your minor/half diminished vocabulary with this one move. Super duper cool.

#1	$D\emptyset 7$ or $Dm7(b5)$	#2	Fm	#3	Fm/D
					
1 - b3 - b5 - b7					

#4 - A "ii - V - i progression" in C minor

$D\emptyset 7$ $G7(b9)$ Cm

#5 - Here's what you are thinking and playing instead

$Fm7$ $G7(b9)$ Cm

#6 - Examples of $Fm7$ licks working great over $D\emptyset 7$

$D\emptyset 7$ $D\emptyset 7$ $D\emptyset 7$ $D\emptyset 7$
