

FUNK IMPROV/SCALE IDEAS

FROM DIGGING DEEPER JAZZ VIDEO #110

Here are some melodic/scale ideas for funk and rock soloing. Full Disclosure - there is SO MUCH more to the style than just "the right notes." Rhythm, repetition, tone, and attitude are a big part of the equation and not addressed here. That said, finding the correct melodic palette is important too. These are four of the most classic, most used sounds in the style. It's safe to say that the vast majority of the writing, playing and soloing you hear in funk, rock and R&B styles uses one of these scales entirely, or as as a point of departure.

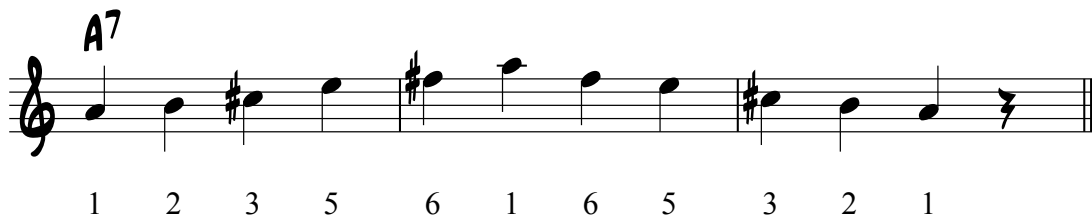

#1 - A Minor Pentatonic (same notes as the C Major Pentatonic Scale)

#2 - A Blues Scale

#3 - A Major Pentatonic Scale

#4 - A Minor/Major Pentatonic Scale (same notes as the F# Blues Scale)
