

CADENZAS & LOOPING

FROM DIGGING DEEPER VIDEO #86

Cadenzas are a great way to practice songs and chord changes. We think of cadenzas as something to be played by the soloist at the end of a ballad, and that is great. But, working of ALL songs as if they are a series of cadenza is very instructive, very telling, and a way to get better FAST.

Looping is another, related practice tool, but one which happens in time. These days, technology (Band In A Box, iRealPro, etc) allows us to set perfect loops of various lengths. Be sure to use these ideas in your practice daily. In general the shorter the length of the loop, the better.

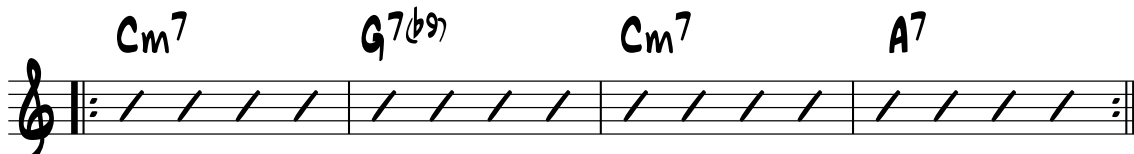

Midnight Voyage "A" section (Joey Calderazzo)

Loop #1

Loop #2

Loop #3
