

PLAYING WITH SHAPES

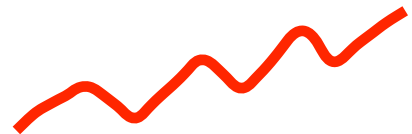

FROM DIGGING DEEPER VIDEO #89

There are many ways we can think of music, especially if we allow ourselves to be just a little more abstract about things. We all talk loosely about how melodies and forms have "shapes," and how harmonies or timbres have "colors." I think we should think a little more, as individuals, about how we personally hear and connect to music, and then spend a little time developing this sense. Shapes, colors, textures, smells, shades, emotions, feelings . . . whatever makes sense to you.

C Major Scale

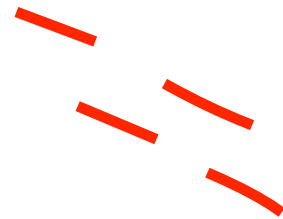

Scale in 3rds

Misterioso (Thelonious Monk)

Diminished Lick

John Coltrane (from the Mr. PC solo)
