

TRIAID PAIRS - ALTERED DOMINANT

FROM DIGGING DEEPER VIDEO #99

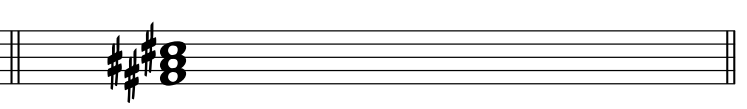

Triad Pairs are a great way to get some interesting sounds into our playing, but more importantly, Triad Pairs are a way to get some very interesting organizations and shapes into our playing. The triads themselves bring a very strong sound and organization, which is the reason we look for triads to use in the first place. The art of finding a cool pair of triads is what gets us some interesting shapes.

Here, in the key of C, we will use 1) an augmented triad built on the root, and 2) a major triad built on the #4. You'll see that this implies a nice C7 sound (C, E, Bb/A#), with a #5 (G#), a #11 (F#) and a b9 (C#/Db). A great C7 altered sound.

#1 - C augmented triad

#2 - F# major triad

#3 - All 6 notes as a scale

#4 - The Altered Scale

#5 - Triad Pair Lick

Stolen fair and square from a great solo by sax player Doug Webb

#6 - Alternating/Inverting Triad Pairs
