

This useful lick can be used over a V-I cadence or a II-V-I. It's basically the same pattern starting on 4 different notes over the Dom. 7th (specifically a G13b9 harmony.) It starts on a #9, 13, #11 and root. All lines begin with half step intervals that descend in minor 3rds. Transpose it as necessary and try it over Ceora, Cherokee, etc. Whatever tunes have a V-I or II-V-I, which is a lot of tunes!

Diminished Scale Lick

All lines begin with half step intervals that descend in minor 3rds
