

SOUND LIKE YOUR HEROES

(FROM DIGGING DEEPER VIDEO #44)

Stan Getz - Style Observations from the “Serenity” album

EMOTION

- Beautiful, flowing, relaxed, mature.
- Very melodic playing (what does that mean, exactly?)

TONE

- A very “intimate sound” - air in his tone, as if he’s playing softly. Whispering.
- High notes, he’ll really push the air. His timbre/tone gets VERY bright when he does this.
- Vibrato - a straight tone, with the vibrato entering later in the note, sometimes just one or two vibrations.
- Some bending of pitches, but less than I would have guessed.

PHRASING

- Very legato phrasing, not the typical “angular” bebop articulation, or not as strong. Smoother.
- The last note in a phrase is very often long, or longer than I’d play.
- Very Motivic playing at times, really developing ideas, especially “shapes.” Repeating shapes.

TECHNIQUE

- Double Time Sections - Damn! Tons of technique.
- Slap-tonguing low notes for effect. NOT subtle!
