

MINOR BEBOP SCALES

FROM DIGGING DEEPER VIDEO #67

Bebop Scales are eight notes scales that we see great jazz players use pretty regularly. Most scales, all the modes, and the typical major, minor and dominant scales are all seven note scales, so these Bebop Scales are special. The fact that Bebop Scales have eight notes means that they fit into a 4/4 measure better than typical seven note scales. Of course, 4/4 = eight 8th notes, so our eight note Bebop Scales line up perfectly inside the measure.

We also did Digging Deeper Jazz videos on the Dominant Bebop Scale (DDJ video #21), and the Major Bebop Scale (DDJ video #23). The scale for each tonality is a little bit different. Here, we are looking at some of the Minor Bebop Scales.

FYI, all the " V " markings above the notes in the examples below are just highlighting the chord tones that land on the beat.

- #1 Minor Bebop Scale (based on dorian, with both the major 7th and the flat 7th)

Dm⁷

- #2 Minor Bebop Scale (based on harmonic minor, with both the major 7th and the flat 7th)

Dm⁷

- #3 Minor Bebop Scale (based on melodic minor, with both the major 6th and the flat 6th)

Dm⁶
