

REVERSE PARTIDO ALTO - #2

FROM DIGGING DEEPER VIDEO #75

If you haven't yet, look at Digging Deeper Jazz video #74, the previous video. There we talked about the Partido Alto rhythm. It's the best place to start, and will give this discussion of Reverse Partido Alto a bit more perspective. You'll also likely be more successful in playing this material if you start back there.

As pointed out in the previous video #74, many rhythms derived from West African roots, like this rhythm, are two measures long. The "3 - 2 Clave" is another great example of a two-measure long rhythmic pattern with West African roots. It turns out that in many of these patterns, we can start with the second measure first, and put the first measure second. That is how we get the "2 - 3 Clave" pattern . . . by flipping around the "3 - 2 Clave." And that is exactly how we get "Reverse Partido Alto."

#1 - Reverse Partido Alto

#2 - Major Scale in Reverse Partido Alto

#3 - Dominant b5/#11 Arpeggio
